JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

ENGLAND.

Case of suspected plague on the steamship Haddon Hall proves to be smallpox.

LONDON, ENGLAND, May 1, 1901.

SIR: I have the honor to state that the case of suspicious illness on board the steamship *Haddon Hall*, at Iymuiden, is reported to be smallpox. I mentioned this case in my letter of the 27th ultimo as suspected plague.

Respectfully,

A. R. THOMAS,
Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report from London—Plague in Cape Town and Mauritius.

LONDON, ENGLAND, May 4, 1901.

SIR: I have the honor to make the following report for the current week. The health of London and Great Britain remains satisfactory. There were no deaths from smallpox in England for the week ended April 27, and only 3 in Glasgow. The number of cases of this disease in the latter town continues to decrease.

The plague report from Cape Town for the week ended April 27, shows 70 cases and 35 deaths. The total to that date was 519 cases and 217 deaths, showing that the death rate has been unusually small. In Mauritius, during the week ended April 25, 2 deaths from plague occurred, but no fresh cases were reported. A case of plague is reported from Constantinople during the week.

Respectfully,

A. R. THOMAS,
Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

GERMANY.

Typhus fever in the garrison at Fort Manteuffel, near Metz.

Vice and Acting Consul Adler reports as follows; under date of April 27, 1901, from Kehl, Germany:

Typhus fever broke out a few weeks ago among the garrison of Fort Manteuffel, a few miles from the city and fortress of Metz, the city of Metz being the capital of the province of Lorraine. Since then, the sickness has taken an epidemic form, and up to date about 300 soldiers and a few civilians have been afflicted—over 20 cases proving fatal. The cause of the epidemic is ascribed to the unhealthy condition of the drinking water used. Also, a few cases of typhoid fever have been reported. The epidemic shows a mild form. The civil and military authorities are doing their utmost to quench the epidemic, and the greatest precautions are being taken to prevent the spreading of the disease.

GUATEMALA.

Monthly report from Livingston—Fruit port.

LIVINGSTON, GUATEMALA, ——— ———.

SIR: I have the honor to submit report for month ended April 30. The following vessels have cleared from this port for the United States: April 3, steamship *Esther*; Stevenson, master; crew, 19; New Orleans
